| 1 | Dorothy M Wylie Nursing Leadership Institute & Health Leaders Institute - Combined Project Database | | | | | | |
| 2 | | | | | | | |
| 3 | Welcome to the combined HLI and DMW-NLI Project Database! This database contains a listing of all of the projects that DMW-NLI and HLI participants have undertaken as part of their institute programs. | | | | | | |
| 4 | | | | | | | |
| 5 | ORGANIZATION OF THE DATABASE: The database is organized into four main sections: Care Delivery, Healthy Workplace, Business of Healthcare, and Personal/Professional/Team Development. | | | | | | |
| 6 | Each section contains clusters of projects grouped under sub-headings for convenience of reference. | | | | | | |
| 7 | | | | | | | |
| 8 | SEARCHING THE DATABASE: You can use the database to search for projects in an area of interest to you, by using the "Find" option under "Edit". Simply type in a key word, and then scroll through the database to find projects containing that word. For example, if you were interested in improving patient flow in the Emergency Department, you might search under "Emergency" and "Patient Flow". Or, if you were interested in improving morale and strengthening teamwork in your work unit, you could search using 'morale', 'satisfaction' and 'team'. | | | | | | |
| 9 | When you identify a project of interest to you, you can contact the "Project Owners" through the organization phone number listed. A word of caution: some of the individuals may no longer be working on the unit or for the organization listed; but hopefully you will locate someone who remembers the project, and can provide you some information. | | | | | | |
